***Allowable Subject Matter***

I. The following is an examiner's statement of reasons for allowance:

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Inoue et al. disclose a method and an apparatus for communication control in a communication network system formed by a plurality of computers including mobile computers for communicating data with each other and providing necessary services over a plurality of interconnected networks, for the purpose of controlling accesses to mobile computers that are moving over the networks.

Therefore, prior art fails to disclose initiating an attach procedure to one of said access nodes by a mobile station, reacting to said mobile station having IP capability by initiating at said access node a selection of a macro mobility entity for said mobile station, sending the identity of said selected macro mobility entity to said mobile station in association with an access context establishment.

Claims 1-20 are allowed based on Andersson et al. (WO 98/43446) in view of Josse et al. (US 6104929).

***Conclusion***
